**3F Filippi**

**TARGETTI**

**DURA**  
LAMP

Since 1952, 3F Filippi S.p.A has been a benchmark in the field of efficient technical lighting fixture design and manufacturing.

The products, which are designed and created exclusively in the Pian di Macina - Pianoro (Bologna) facilities, are an expression of the company's ability to combine the traditional and the modern, craftsmanship and technology, appearance and functionality, and efficiency and sustainability.

Targetti has been designing and producing indoor and outdoor architectural lighting fixtures since 1928.

For over ninety years, its products have been illuminating prized artistic and architectural works throughout the world and are the expression of innovation, research, and attention to detail.

The company has always placed its experience and expertise at the disposal of architects, designers, and professionals in the lighting world.

With decades of experience and solid technical skill, Duralamp offers a wide range of high quality and efficient products.

Thanks to its expertise, it selects the latest generation components, engineering reliable products, with an offer that includes sources, LED strips, and lighting fixtures.

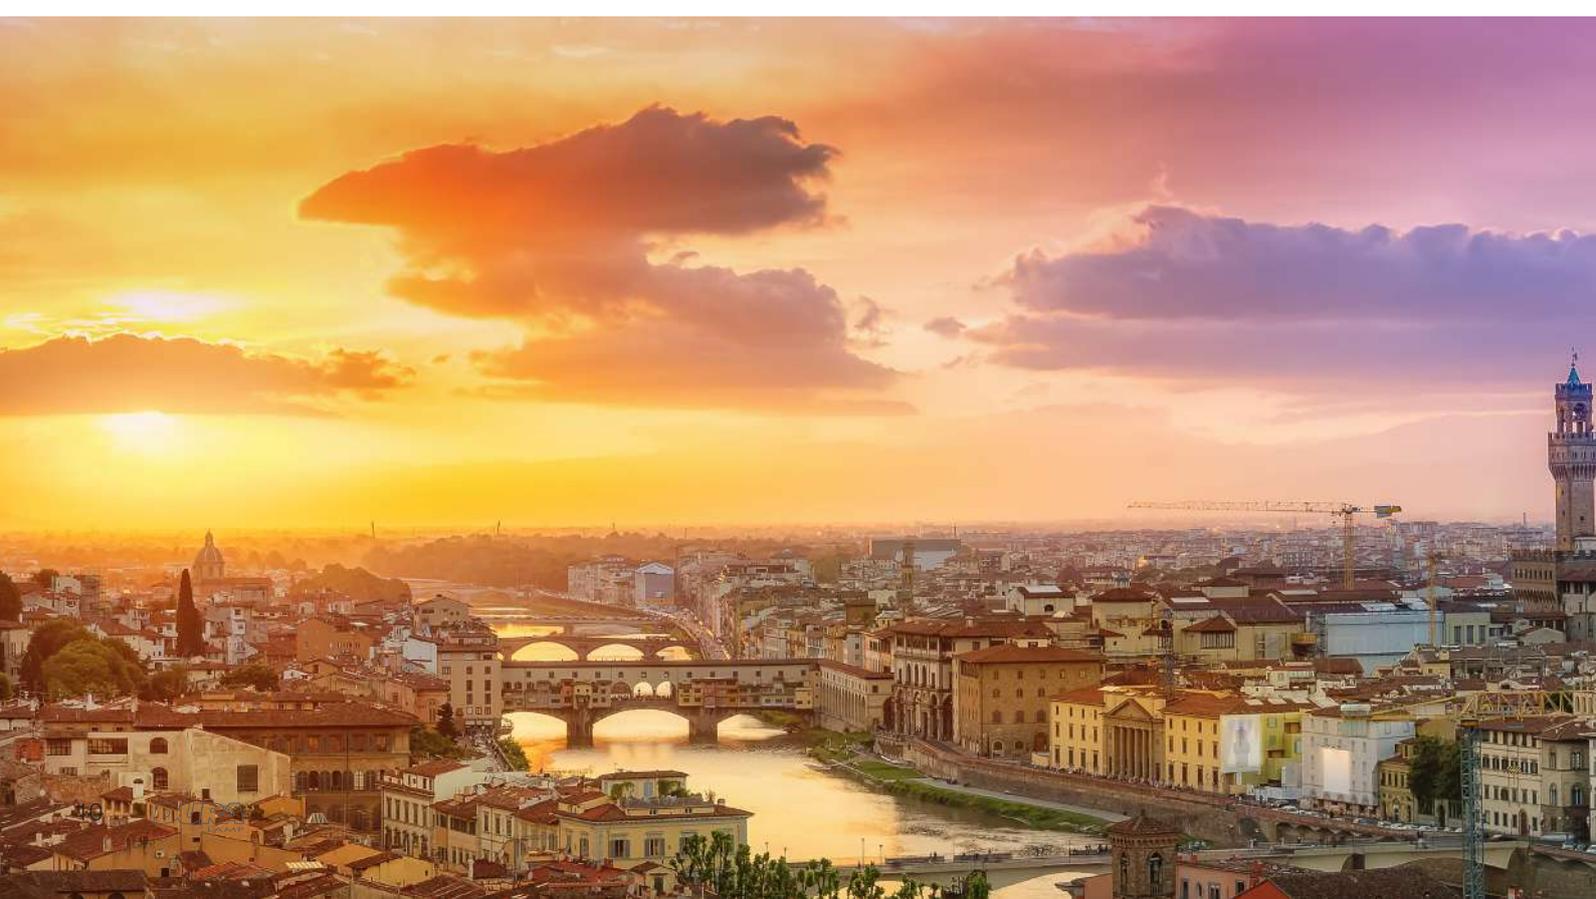

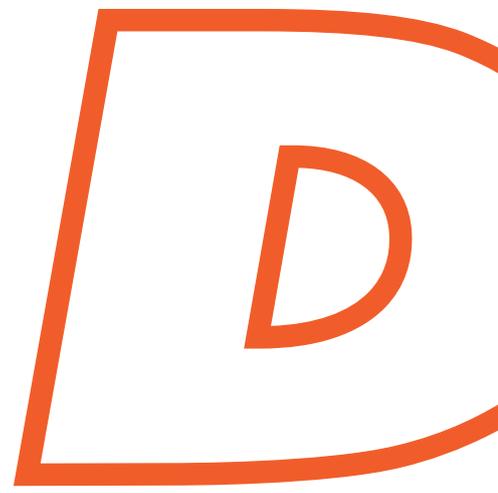

## **An Italian company open to the world**

Founded in Florence at the beginning of the 1980s as the Luminous Springs division of Targetti Sankey s.p.a., in 1982 Duralamp became independent and began to develop in the manner most congenial to it, with an emphasis on product engineering and the improvement of technologies and production processes.

The implementation of these processes and methodologies took shape at the beginning of the 2000s, on the one hand with the acquisition, in Joint-Venture, of a production site in China, and on the other hand with the development of reliable and long-lasting partnerships with other leading production realities both in Europe and in the East.

Duralamp is part of the 3F Filippi Group | TARGETTI. The recent acquisition by 3F Filippi has made it possible to develop synergies of great interest, and allowed the Group to structure an extremely varied product portfolio. The breadth of range, production capacity and customer response has now multiplied and is able to meet both the needs of Electrical Equipment Distribution and those of Specifiers and Buyers, Architects and Lighting Designers, at a global level.

## Mission and Vision

**We believe that by providing the best products at the best prices it is possible to build a relationship of trust with customers that lasts over time.**

Why do we believe we can do it? Because restructuring Standardised commodity products and finding the right balance of quality or even 'forging' light to meet the particular needs of an installation to us is a source of great professional satisfaction that turns into customer service.

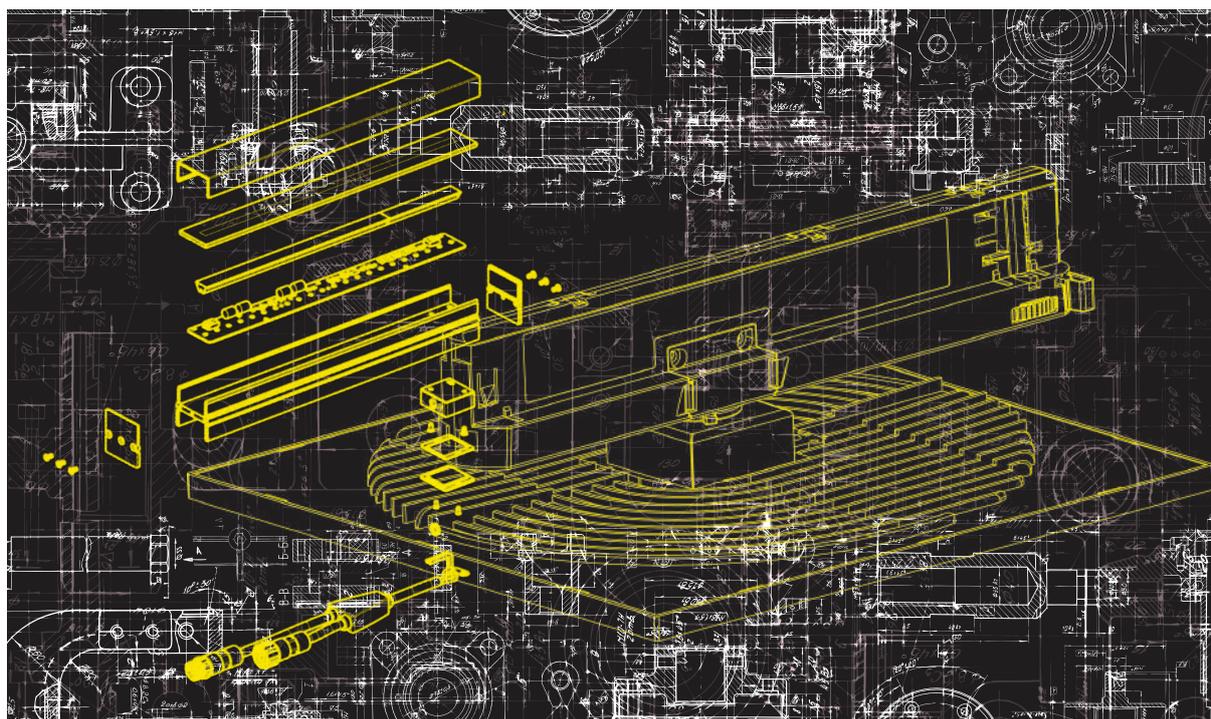

In a wider **Vision** we work to make a positive impact on people's lives with lighting environments that have never been seen before in terms of quality and usability. While paying attention to containing both design and production costs, we are committed to using cutting-edge technology to create a new dimension of light quality and control to place users at the centre of their choices.

## Technological evolution

The entire world of mass produced “light fixtures” has changed: today the request is for “lighting solutions” that are differentiated according to uses and areas of application. Duralamp is able to provide both a range of retrofitting fixtures and commodity lighting fixtures (Panels, Led, Hi Bay, Batten, Projectors etc.) as well as LED strips and power supply systems and intelligent control systems (Smart Building).

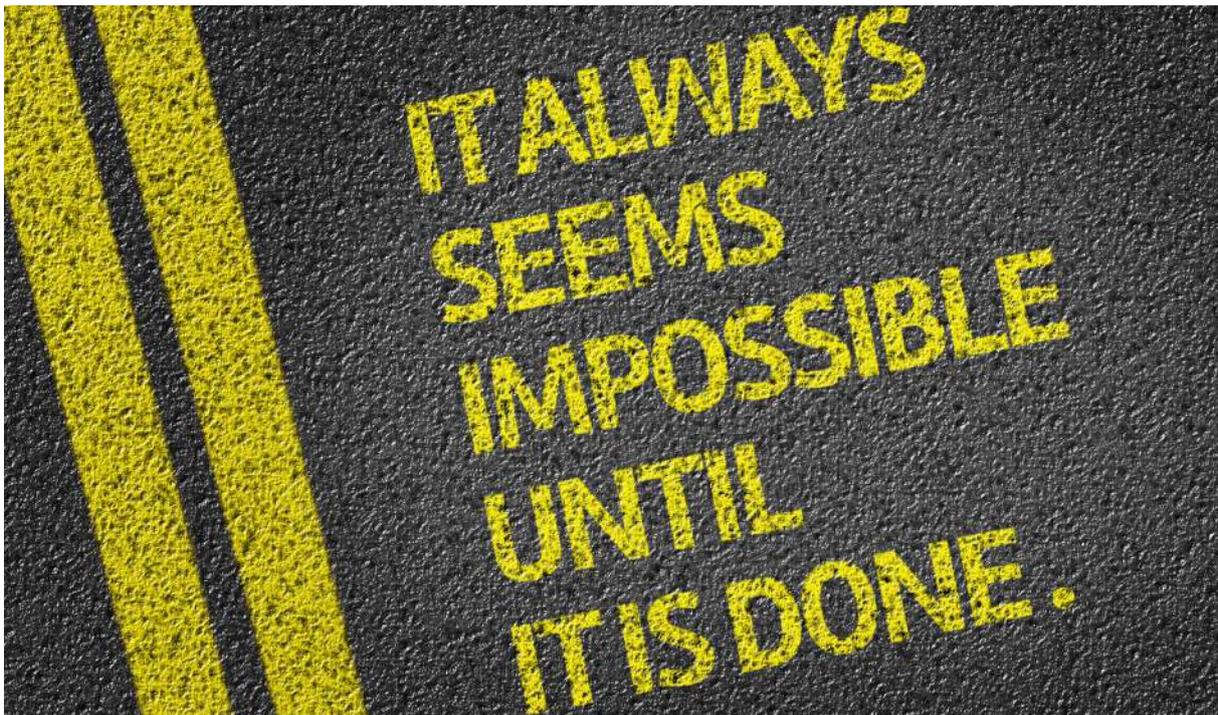

Our product improvements are dedicated to making a difference to the lifespan, emission stability over time and full compliance with requested parameters: they may not be visible but it is their effectiveness that interests us. In a world in continuous evolution we manage to maintain control over production and the choice of components to produce products with a quality/price ratio that can meet the different needs of the market.

## Custom-made products

The majority of products distributed worldwide are those that appear in catalogues that are differentiated according to reference markets. Yet it is custom-made products that give us the most satisfaction and allow us to put into practice all our expertise and technical ability... To satisfy particular requests from specifiers, lighting designers and architects we are able to provide 'custom-made' products, engineered, designed and built with the care a tailor puts into a made to measure shirt...

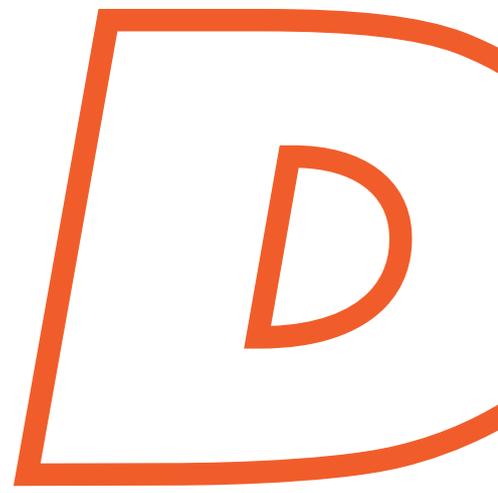

## Where can you find us?

In many areas Duralamp is present with direct sales representatives able to propose solutions and provide technical support for the choices made by Specifiers. The company can also rely on a network of Distributors who manage their respective local markets with stock and pre-sales and after-sales services. This extensive and varied commercial network is a real asset that complements the international structure of the various branches in the Group. The network Duralamp operates through is really extensive and allows them to participate actively and effectively in projects in different countries around the world, in Europe, the USA, South America and the Far East.

More details on [www.duralamp.it](http://www.duralamp.it)

## Why choose Duralamp

Duralamp has a great advantage: a streamlined and flexible structure ready to study technology to improve existing solutions or discover new ones. Four decades of first-hand experience in production sites in China, an onsite engineering team, constant research into the most suitable materials, the most effective industrial processes, monitoring and controlling all production processes and cutting edge technology in our production sites both in Italy and abroad... all allow us to provide the expertise that has allowed us to successfully conclude high-level projects around the world. Of course in addition to daily operations that are subject to ISO 9001 Certification Quality Standards.

All Duralamp products conform to all European Directives and where required have obtained Quality and Safety marks from other countries:

# KEY

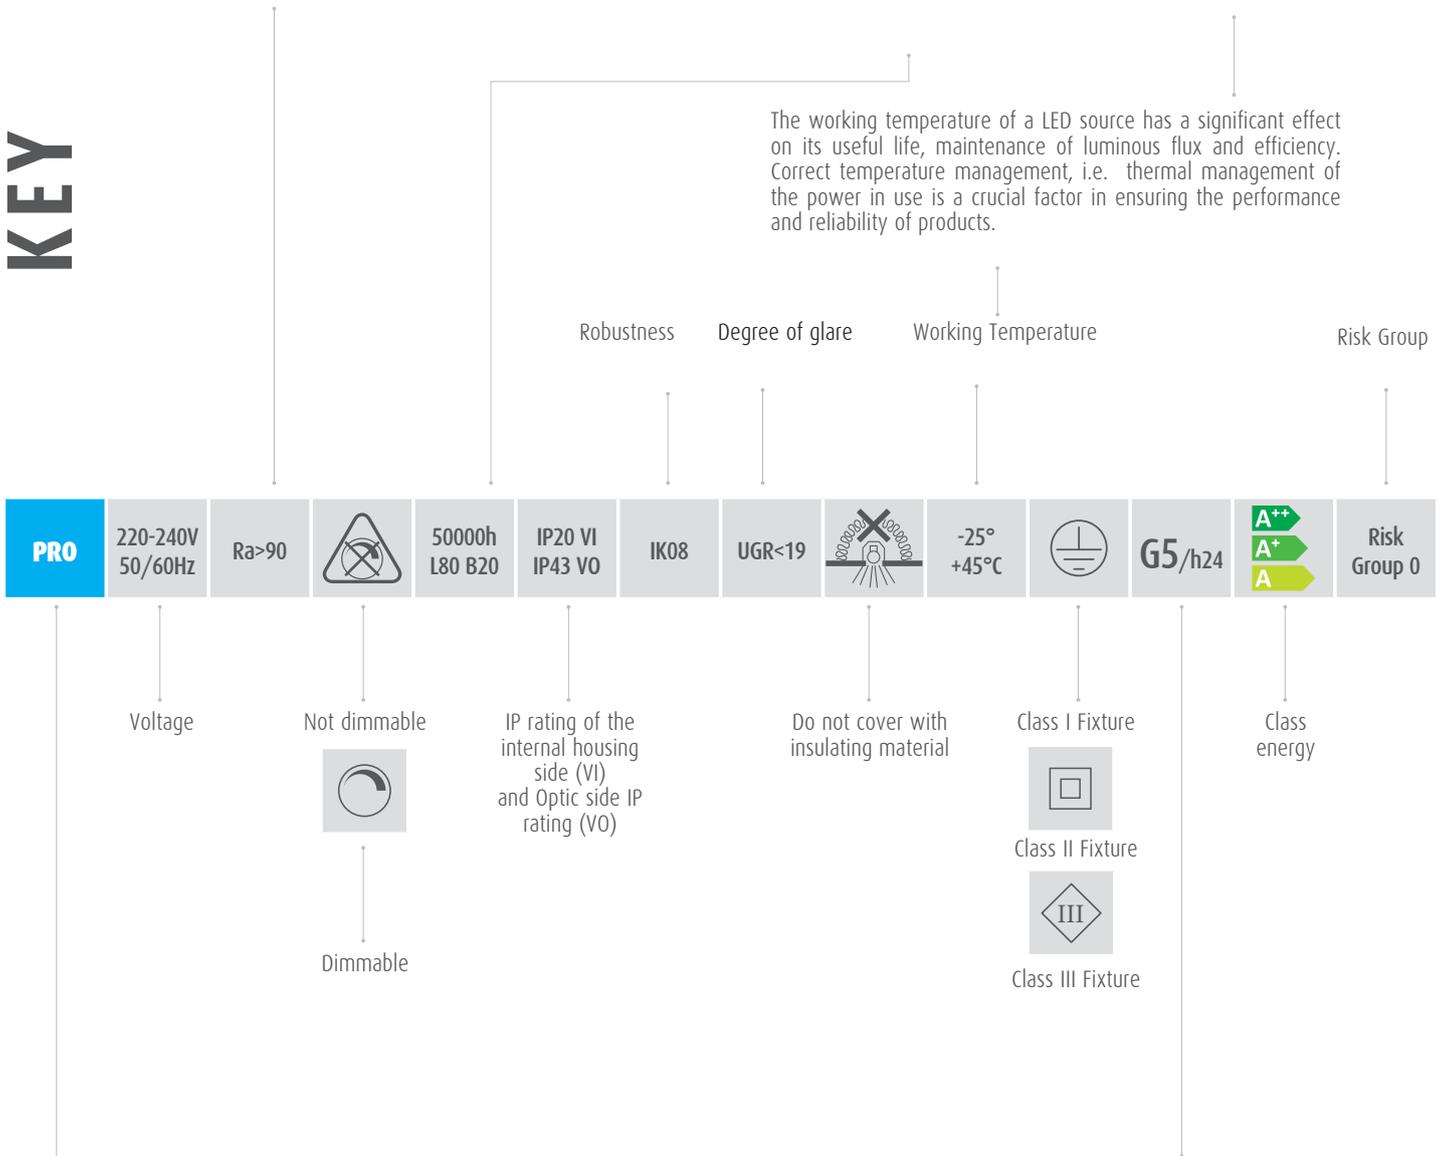

## EXCELLENT COLOUR RENDERING

Good colour rendering improves the perception of an environment and makes it pleasant. Yet it is what is 'behind' a simple "Ra" value that really creates a good reading of the colours in an environment: modulation of the light spectrum and centring of the colour point on the McAdam ellipse are all elements that Duralamp work intensely on to keep production quality levels high.

## LED LIFESPAN

LED lamps, unlike traditional lamps do not suddenly stop working but gradually decrease their initial flow unless there are defects or electric shocks. A LED lamp is considered to be no longer functioning it reaches 70% of their initial flow (L70). For example 50'000h L80B10, meaning the period of time (50'000h) in which 10% (B10) of the LED products of the same type has gradually fallen below 80% of the initial nominal flux.

The working temperature of a LED source has a significant effect on its useful life, maintenance of luminous flux and efficiency. Correct temperature management, i.e. thermal management of the power in use is a crucial factor in ensuring the performance and reliability of products.

- BASIC** Ideal products for markets of consumers
- PLUS** outstanding performance and the best quality-price ratio
- PRO** specific applications and top-level features
- PROJECT** production on project specification

## LED WARRANTY SPECIFICATIONS KEY

- G2** Up to 2 years (4000h/year)\*  
\*4000h = 11h a day x 365 days. Without limitations on the duration of use for the first year, provided the observance of the installation conditions.
- G3** Up to 3 years (4000h/year)\*  
\*4000h = 11h a day x 365 days. Without limitations on the duration of use for the first year, provided the observance of the installation conditions.
- G4/h24** Full Guarantee 4 years (24h/24h) h24, provides Total Warranty! The winning element for great projects.
- G5/h24** Full Guarantee 5 years (24h/24h) h24, Total Warranty up to 5 years use!

## REALISTIC LUMEN

Data on luminous flux shown on the tables of Duralamp is REALISTIC and measured on the fixture after one hour of continuous use in actual conditions of use. Duralamp does not show nominal values of sources that, being higher than those emitted by fixtures are misleading for lighting considerations and for performance evaluation.

## EXCELLENT COLOUR RENDERING

Good colour rendering improves the perception of the environment and makes it more pleasant. Yet it is what is really 'behind' a simple "Ra" data that really creates good colour rendering in an environment: modulation of the light spectrum and centring of the colour point on the McAdam ellipse are all elements that Duralamp work intensely on to keep production quality levels high.

# COLOUR RENDERING

## TM30

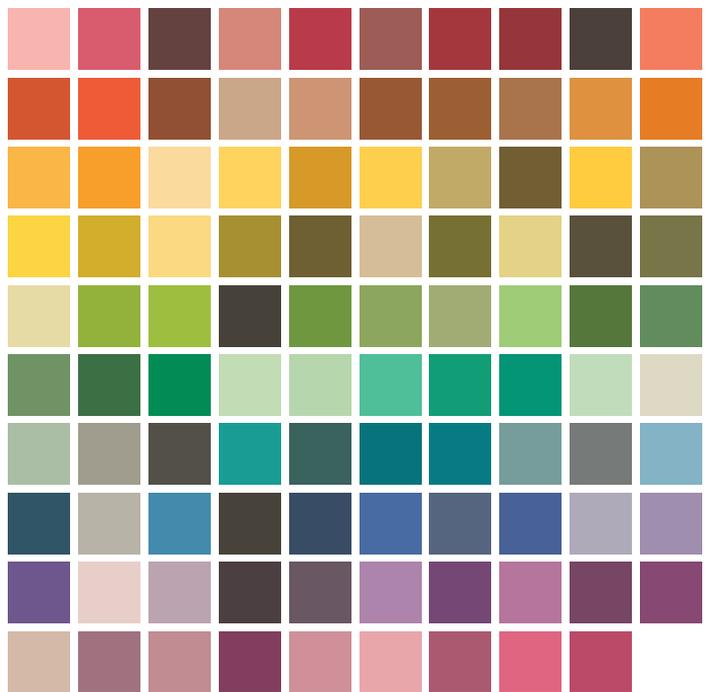

The Colour Rendering Index **Ra** or **CRI**, is a dimensionless index that ranges from 0 to 100 and partially describes the capacity of a light source to faithfully render the colour of a consistently lit object in line with what a reference source would do. It is based on the adherence of a source to the light emitted by a tungsten filament evaluated on a panel of 14 colour samples, of which only the first 8 are taken into consideration, none with saturated hues.

The **TM-30** 30 index allows for a more complete reading on the way a source is able to render colour. It introduces the concept of saturation, uses a balanced mixture of incandescent lamps and sunlight as a reference and extends colour samples to 99 subdivided into 7 reference areas with colours from nature for example flowers and leaves, skin tones, colours of paintings, textiles, plastics, printed material and 14 CRI colour samples.

**CRI** COLOUR RANGE

**TM-30** COLOUR RANGE

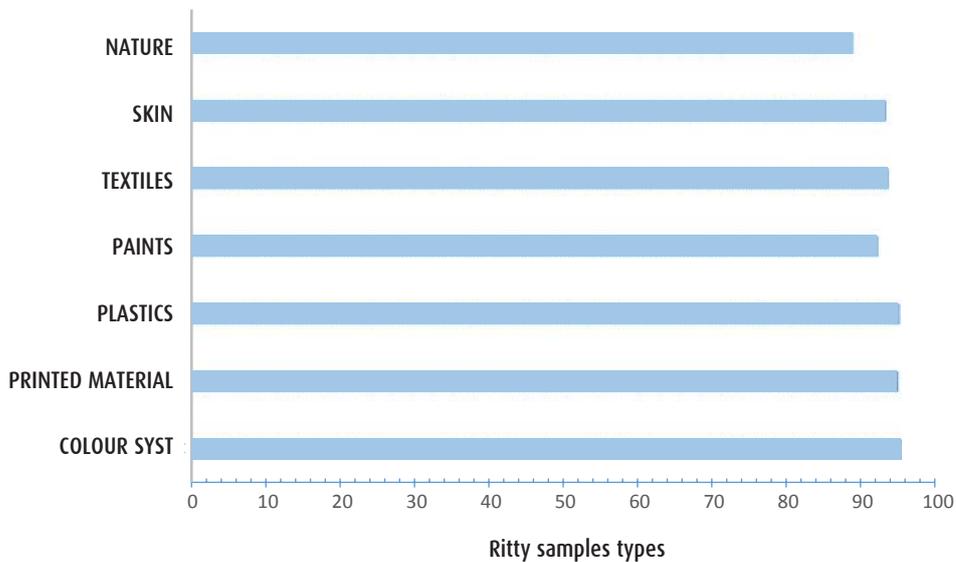

The additional information that TM30 can give is provided by two graphs that summarise the values relating to Rf, Rg and Hue Shift (a shift in the colour hue, or the perception of a false colour compared to what we would see in sunlight), and the second how the source works for groups of materials (99CES) for immediate understanding:

The “rendering” of the source is expressed with a series of explanatory graphics of the colorimetric and qualitative characteristics and 2 distinct indexes.

**The fidelity index Rf**, which describes the ability of the source to render colours.

It varies on a scale of 0 to 100 where 100 is perfect adherence. It is also possible to have Rf targeted on one of the seven reference areas. For example “Rf skin” refers to the ability of the source to express the colours relating to the reference area concerning skin tone. It is similar to Ra but can be lower given that the reference colours range from 14 to 99.

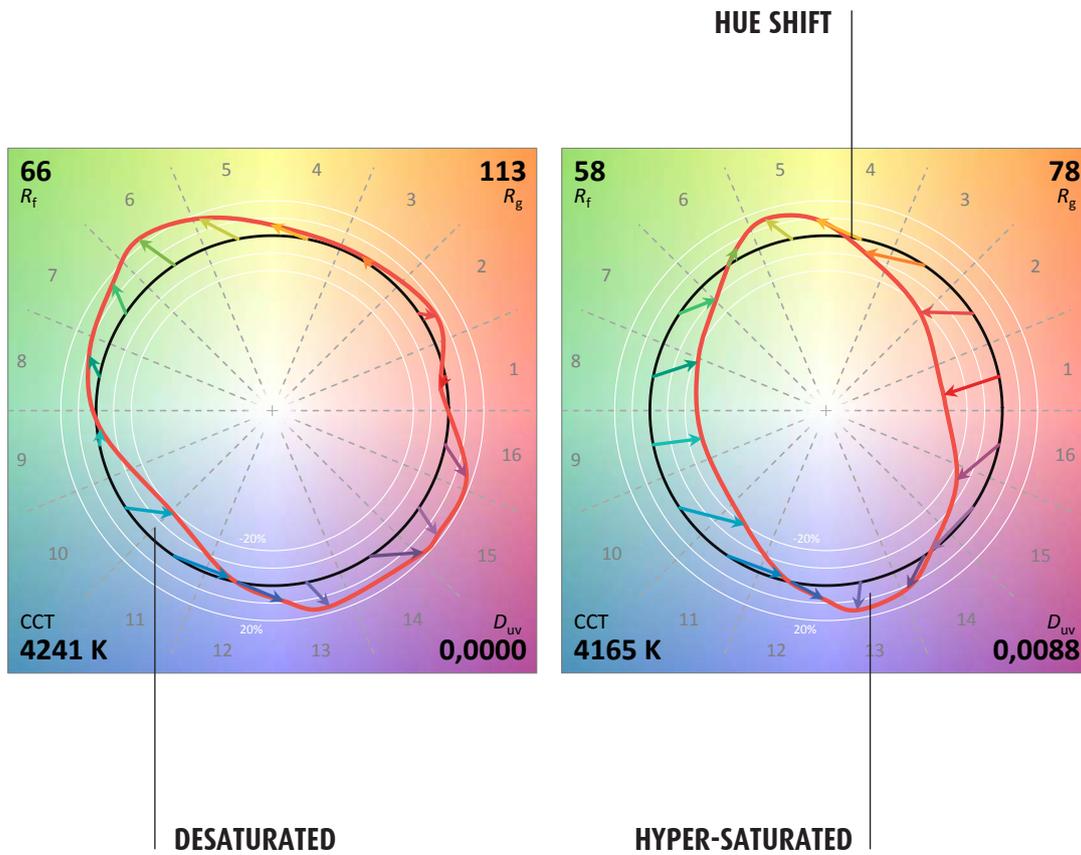

**DURALAMP is able to provide TM-30 values for all ranges in the catalogue on request.**

# COLOUR RENDERING

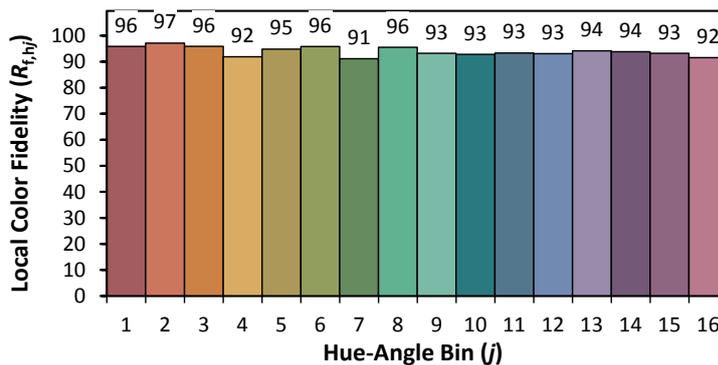

## TM30

The **Gamut index  $R_g$** , which expresses the saturation level of the colours lit by the source. It varies on a scale from 60 to 140. Values lower than 100 indicate a decrease in saturation, higher values indicate an increase in saturation therefore more vivid colours.

Colours will be more or less saturated depending on whether they are inside or outside the reference circle.

The last in-depth graph is the detail of the deviation and rendering of semitones compared to the reference source that is represented by the following diagram:

**DESATURATED**

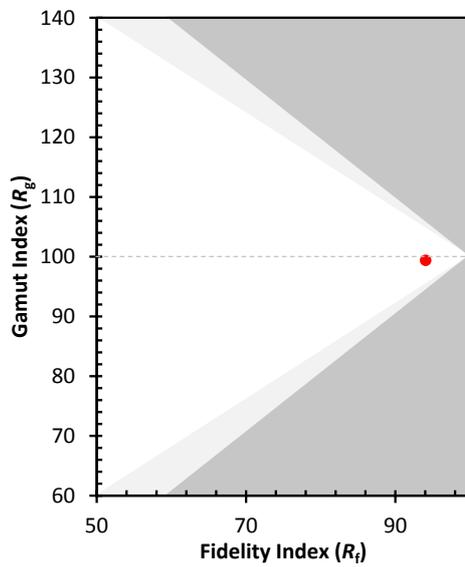

**HYPER-SATURATED**

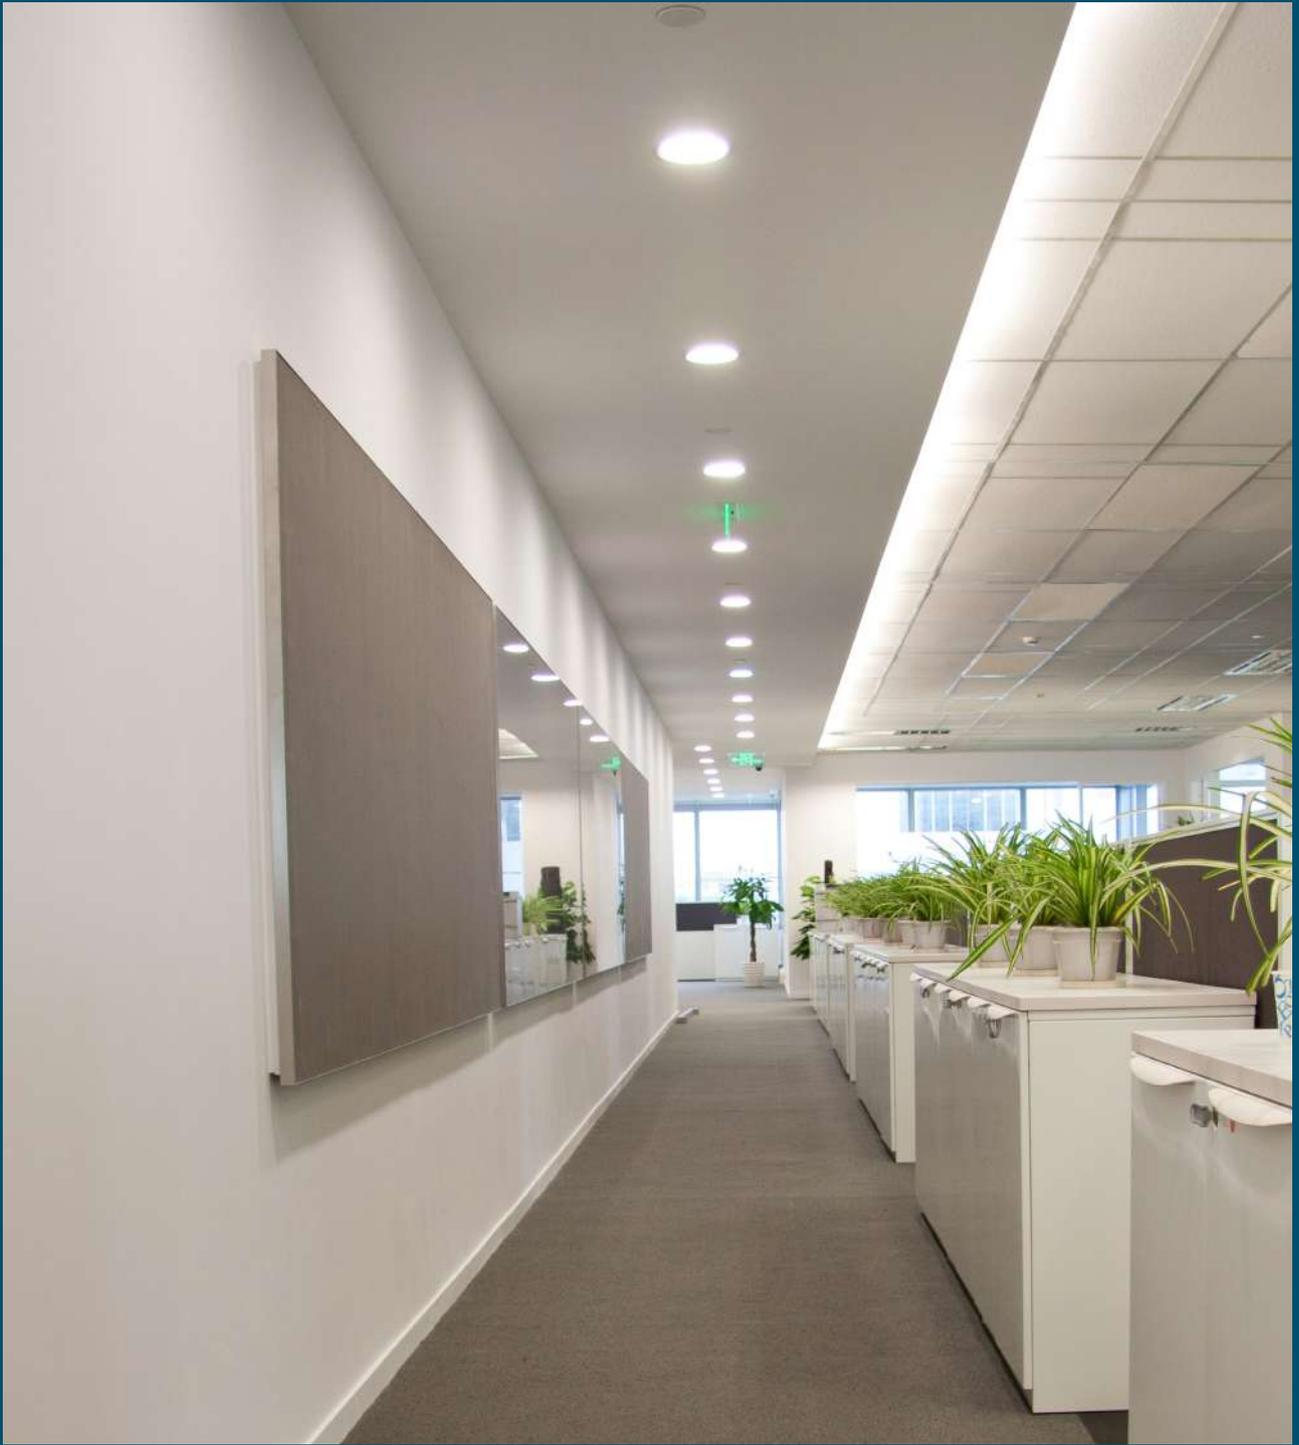

**HYPER-SATURATED**

**DESATURATED**

**HUE-SHIFT**

# LESELI DOWNLIGHT CCT

## TYPE

LED source with SMD technology and high efficiency chip integrated into a recessed luminaire. Remote power supply equipped with a dip-switch to select the colour temperature.

## CHARACTERISTICS

The deep recess of the light source combined with the advanced lens technology ensures glare ratings from UGR<11 to UGR<19. Applications include offices or places of work where computer screens are used and low glare is essential. A sealed light source provides easy maintenance and cleaning.

## MOUNTING

Complete with springs for easy fastening into false ceilings. Cable (1 m) with IP65 quick connector.

## MATERIALS

Thermally conductive body; extremely light and manageable.

# LESELI SLIM DS

## TYPE

Ultra slim LED downlights with SMD technology and a high-efficiency chip.

## CHARACTERISTICS

Downlights with extremely limited width and remote driver.

## MOUNTING

Complete with springs for easy fastening into false ceilings. Surface/ceiling mounting options available with frame accessories.

## MATERIALS

High dissipation die-cast aluminum body with anti-yellowing PC screen. Extremely lightweight for use in any false ceilings.

# HELIOS UGR RECESSED FIXTURES

## TYPE

LED source with COB technology and an integrated high efficiency chip in a low glare UGR recessed light fixture.

## CHARACTERISTICS

The deep recess of the light source combined with the advanced lens technology ensures glare ratings from UGR<11 to UGR<19. Applications include offices or places of work where computer screens are used and low glare is essential. A sealed light source provides easy maintenance and cleaning.

## MOUNTING

Quick coupling system to false ceilings using springs.

## MATERIALS

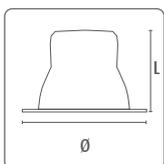

Aluminium body; extremely light and easy to manoeuvre.

Luminous Flux Data is REAL. Values are measured on actual use conditions. Nominal values of the LED source are not stated.

# LESELI-Q PRO

## TYPE

High efficiency SMD LED sources integrated into the body of the light fixture available in 3 different versions: recessed, ceiling for surface installation and with a track attachment.

**FLICKER FREE**

## CHARACTERISTICS

The possibility to use the same fixture with different installation types makes it possible to maintain a uniform aesthetic in different areas of the same space.

## MOUNTING

Recessed: with a rapid fixing system to attach to the plasterboard ceiling using springs. Electrical connection and free wires.

Ceiling mounted: order the frame with separate code.

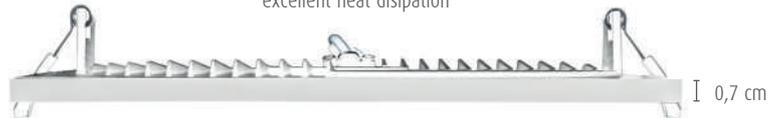

Electrical connection and free wires.

Track version: using its eurostandard compatible adapter.

## MATERIALS

High dissipation die-cast aluminum body with anti-yellowing PC screen. Extremely lightweight for use in any false ceilings. White painted aluminum frame.

Back panel in finned aluminium for excellent heat dissipation

# LESELI MINI

## TYPE

Low thickness, small size LED downlights.

## CHARACTERISTICS

Compact and easy to install. Tilt Adjustability 30°. Special design of the lens ensures excellent light beam diffusion. Non removable internal power supply.

## MOUNTING

Complete with springs for easy fastening into false ceilings.

## MATERIALS

Heat resistant, anti-yellowing plastic body.

# MULTI-OPTIC RECESSED FIXTURE

## TYPE

Rectangular recessed fixture for two adjustable GU10 lamps.

## CHARACTERISTICS

Widely used in retail installations, it meets the needs of those who prefer a recessed ceiling luminaire with replaceable lamps. It offers the advantage of having both multidirectional and adjustable light beams from + 15 ° to -15 ° in the vertical plane. Houses PAR16 lamps; compatible with all GU10 lamps in the Duralamp catalogue.

Max 30W.

## MATERIALS

Body in black painted aluminium with silver colour frame.

## MOUNTING

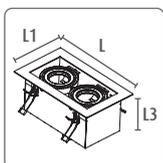

Recessed with the special galvanised aluminium springs. Complete with GU10 lamp holder

Lamps not included: Picture shows fitted with MULTI100 GU10.

# ZKRR RECESSABLE RING: ADJUSTABLE AND WITH OPTIONAL OPTICS

## TYPE

Recessed orientable ring with interchangeable optional optics for MR16, PAR16 lamps and Module.

## CHARACTERISTICS

The recessed ring, that allows an orientation of the source of 20°, can be fitted (snap on) with metal optics that can modify the lighting output by offering accent or antiglare solutions.

## MATERIALS

Body and optics in painted metal body.

## MOUNTING

Equipped with springs for quick installation.

The possibility to easily change the beam using the beam shapers, allows to obtain different effects with the same fixture: ideal in retail spaces.

The ZKRR ring mounts the lamp in a recessed position of 4 cm.

## ZK RECESSABLE RINGS: FIXED IP65 AND ORIENTABLE IP20

### TYPE

Recessed orientable ring with interchangeable optional optics for MR16, PAR16 lamps and Module. IP20 orientable version and IP65 fixed version.

### CHARACTERISTICS

The same ring declined in two versions to fulfill different installation needs in the same environments. Ring for recessed installation of MR16 / PAR16 lamps complete with front screen.

### MATERIALS

Painted metal body.

### MOUNTING

Equipped with springs for quick installation.

EUROSTANDARD PLUS

# DURA BEAM - TRACK LIGHT

Die-cast painted aluminium body.  
Integrated electronic driver.

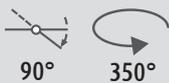

The graduated ring opens by unscrewing and the lens can be replaced with a click.

Optimised optics for power.

The essential design can be used everywhere

Minimum footprint with effectiveness of up to 90 lm/W

Ra >90

The centre of gravity always remains in axis with the track irrespective of where the projector is aimed.

Cylindrical section and very small diameter:  
50 mm 60 mm 80 mm

**12W 20W 30W**

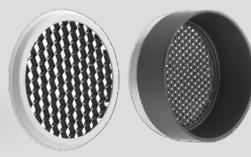

Can be equipped with several 'beam-cutting' accessories to meet different project needs:

**ADAPTER FOR SURFACE INSTALLATIONS**

**OPTIONAL LENSES**

**ANTI-GLARE LOUVRES**

**CUT OFF**

**ASYMMETRICAL CUT OFF**

# DURA BEAM - TRACK LIGHT

## TYPE

Professional LED projectors for track mounting.

## CHARACTERISTICS

Same shape with 3 different dimensions and power choices to cover all requirements. Can be used with Euro-standard Plus tracks as well as with other brands': Staff, Nordlux, Nordic, Global, etc.

## OPTIC

High efficiency Ra>90 LED Chip on Board. Precision optics with dichroic effect lens. Adjustable from 0° to -90° on the vertical plane and 350° on the horizontal plane.

## MATERIALS

Die-cast painted aluminium body; black or white colour.

## MOUNTING

Onto an electrical track in 3 phases; fixtures equipped with a safety lock to fix to the tracks.

## NB

Non Dimmable.

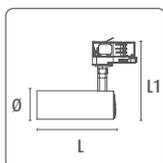

## POWER SUPPLY

Electronic driver integrated in the fixture body.

# EUROSTANDARD PLUS

## TYPE

Eurostandard Plus track from the Targetti collection. System is a 3 phase mixed system with two additional conductors intended to manage a general data signal (for example DALI, DMX). Electrified track in three lengths in extruded anodized aluminum or in extruded painted aluminium. Conductors in copper insulated in PVC.

## MOUNTING

There are three possible installation systems: directly on false ceiling (using the needlepoints on the track and the suspension kit), on ceiling using a metal clip or hanging by a mounting kit.

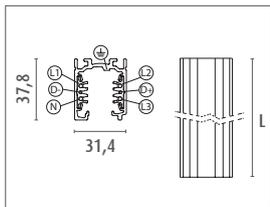

## POWER SUPPLY

Frequency: 50Hz.

Rated current and voltage: L1/L2/L3/N/ground 16A/440V + D+/D- 2x1A/50V FELV AC (DALI). Phase / phases power: 3,6kVA / 10,8kVA.

# EUROSTANDARD PLUS

## ELECTRICAL SCHEME

During the wiring the electrical scheme of picture must be followed.

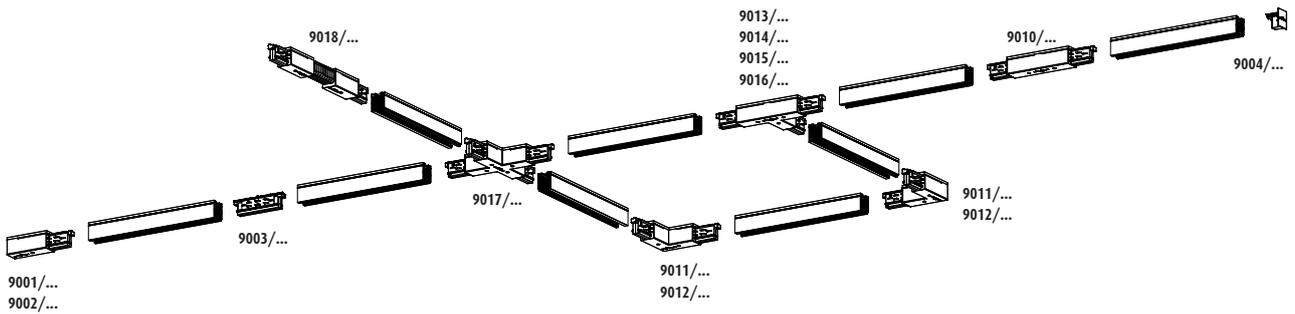

## LOAD SCHEME

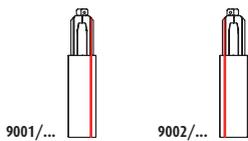

## INSTALLATION

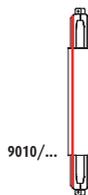

There is a polarity on the lighting track to guarantee the right connection of the multiple pieces of the track. Also end-feeds and connection joints have a polarity that must be taken into account in order to choose the right component. In the catalogue sketches of these articles, the position of the polarity is highlighted with a red line.

# SLIMFLUX 60X60 BASIC + UGR PANELS

## TYPE

Ultra-flat LED fixtures with lateral lighting

## CHARACTERISTICS

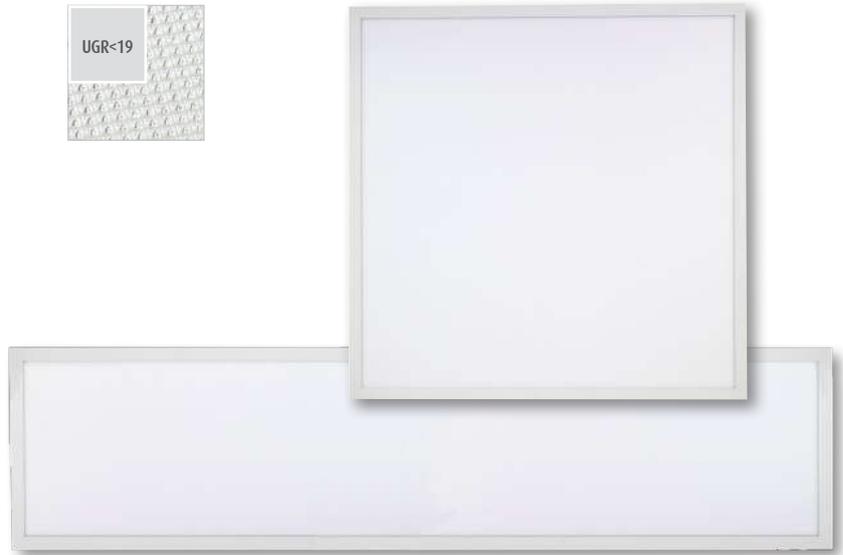

Side heat dissipation. Immediate switch-on. High colour rendering: Ra>80. Remote power supply included. Do not use with dimmer. If you want to dim or use the multi-current power supply dimmer, see the relevant page of the catalogue. UGR version also available. Class II fittings.

## MOUNTING

Possibilities include: recessed, suspended, ceiling/wall. Surface mounting & adjustable suspension wire kits are available as accessories.

## MATERIALS

White painted metal body.

# SLIMFLUX PANEL IP65

## TYPE

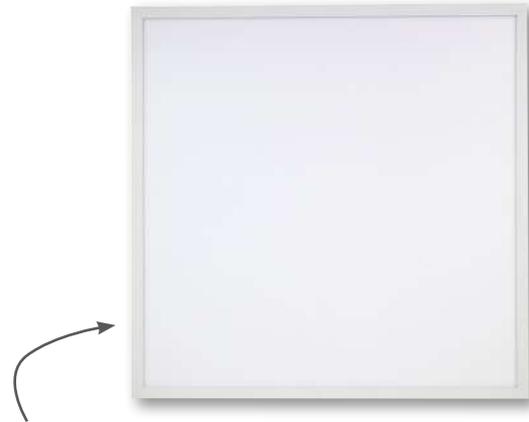

Very thin LED panel with IP65 protection rating.

## CHARACTERISTICS

Panel equipped with a resin coated power supply providing an IP65 connection to both the panel and exposed wiring. May be used in installations that are exposed to particularly difficult environmental conditions without the need for precautions to protect the driver. Panel suitable for outdoor installations and in places such as bathrooms, kitchens, plant areas etc. Equipped with a GORE-TEX® valve to compensate for pressure variations due to thermal changes and to prevent the formation of condensation in the fixture.

## MATERIALS

Painted white aluminium body; PMMA screen.

Equipped with a GORE-TEX® valve to compensate for pressure variations

## FLICKER FREE

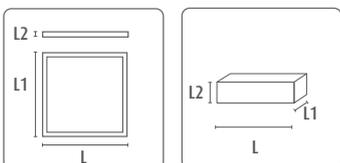

Providing greater visual comfort, improved definition of detail and reduction of stress.

# SLIMFLUX MULTI CURRENT PANEL RA>80 AND RA>90 - PRO

## TYPE

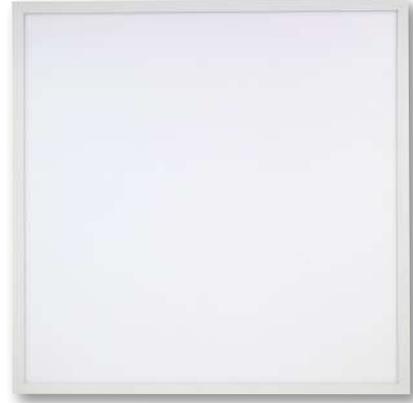

Very thin LED panel with UGR<19 Lateral lighting, and multi current power supply.

## CHARACTERISTICS

The multi current power supply unit makes it possible to choose the drive current of the fixture upon installation depending on the required illumination. This type of panel allows for installation of the same product in different areas to obtain the most suitable amount of light in each space while maximising energy savings. Luminaire is equipped with a fall arrest system and a terminal board for cascade connections. Driver ENEC. Colour rendering >80 and >90.

## MATERIALS

Painted white aluminium body; High transmittance PMMA optical screen.

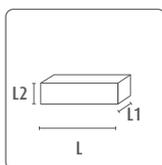

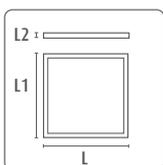

Luminous emission table and total power of the panel according to the setting of the power supply switch.

# CEILING-MOUNTED SLIMFLUX BACKLIT PANEL RA>80

## TYPE

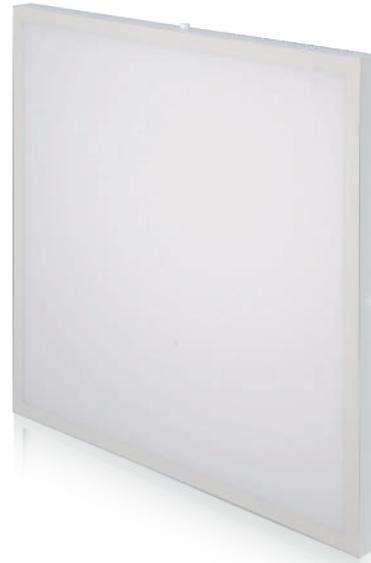

LED panel or direct lighting complete with a ceiling-mounted frame for surface installation. Also available in a UGR version.

## CHARACTERISTICS

Fixtures can be also be surface mounted both vertically and horizontally. The positioning of the LED sources on a horizontal plate ensures lighting uniformity on the screen surface and excellent efficiency levels. If a dimmable version is needed, please use the multi-current dimming power supply  
Colour rendering >80.

## MATERIALS

White painted aluminium body; high transmittance optical PMMA screen.

## FLICKER FREE

## SLIMFLUX PANEL

The peculiar shape of each reflector, together with the set back source positioning, allow for precise control of the light emission and the reduction of glare, obtaining  $UGR < 13$ .

SLIMFLUX 60x60 Q4: mounting with the KTLQ4-SP accessory.

Thickness only 15 mm

For the photometrics see the special section or consult the web site.

# SLIMFLUX PANEL 60X60 Q4

## TYPE

LED panel with dedicated micro modular optics for better beam control.

## CHARACTERISTICS

The primary lens, coupled with a special reflector dedicated to managing every LED beam allows for precise light distribution and total glare control, ensuring UGR<13.

## MATERIALS

White painted metal body.

## NB

Remote driver included.

OPTICS DETAIL

# VINTAGE RECESSED PANEL

## TYPE

Recessed panel 'vintage' style, with integrated non replaceable high efficiency LED source.

## CHARACTERISTICS

'Vintage' recessed panel ideal to maintain existing aesthetics and provide significant energy savings and lower maintenance costs.  
UGR<16

## MATERIALS

Steel body treated with UV resistant polymers; anti-glare louvre high reflectancy aluminized polycarbonate with 83% efficacy.

## POWER SUPPLY

Integrated power supply. Integrated light source not replaceable.

## SLIMFLUX

Surface mounting with  
LPLAF060 frame

## SLIMFLUX ACCESSORY

### TYPE

Frames for mounting LED panels on ceilings.

### CHARACTERISTICS

Make it possible to use SLIMFLUX panels in ceilings where there is no possibility to install recessed panels; frames can hide the drivers.

### MATERIALS

LPLAFO1203: painted sheet metal; LPLAFO603 epoxy painted extruded aluminium.

### NB

The LPLAFO60 and LPLAFO120 models are installed using surface fixing brackets; the LPLAFO6030 and LPLAFO1203 models the frame fixes directly to the surface. Screws and plugs supplied.

Slimflux 60x60: surface mounting with the frame.

Suspension version with translucent panel and direct/indirect lighting

**SUSPENSION**

**RECESSED MOUNTING**

**CEILING MOUNTING**

# ROUND 60 - DIMMABLE

## TYPE

Slim LED panel.

## CHARACTERISTICS

SLIMFLUX ROUND 60 installation possibilities: with recessed driver or surface mounting (the panel remains 43 mm away from the mounting surface).

SLIMFLUX ROUND 60 SUSPENSION: pre-wired with ceiling cup to be mounted to the ceiling (driver included) and 85 cm long adjustable suspensions wires.

## MATERIALS

White painted metal body; frontal methacrylate panel.

## NB

'On Project' suspended version with translucent panel and direct/indirect lighting.

\*Contact the sales force for MOQ and delivery times.

For the photometrics see the special section or consult the web site.

## SLIMFLUX PANEL

Light is diffused from the fine white frame to the methacrylate panel. Fractioned by micro incisions on the panel light is directed predominantly downwards. 30% of the light is projected upwards to create a striking effect that adds to any classic or modern environment.

# UP&DOWN TRANSLUCENT DIMMABLE PANEL

## TYPE

Double emission translucent LED panel.

## CHARACTERISTICS

Fixture with visual interest characterised by dual emission - downwards and upwards - along with the translucency of the panel itself.

## MATERIALS

White frame with methacrylate panel.

## POWER SUPPLY

Remote power supply hidden in a white metal painted gallery housing to be attached to the ceiling.

## NB

Complete with a remote driver and adjustable suspension wires (L = 130cm). Cables attached with a safety carabiner.

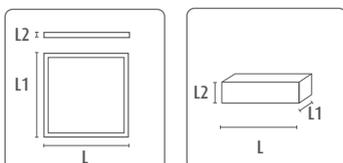

## DIMMABILITY

Can be used with 1-10V dimmers

# Indoor

---

PLAFO T2

FILINO T5

# PLAFO T2

## TYPE

LED lamps with SMD technology in a fixture for ceiling or surface installations. Version with proximity sensor.

## CHARACTERISTICS

Excellent light diffusion across the entire surface. Non-replaceable internal power supply.

## MATERIALS

Metal body; satin effect plastic diffusor.

## APPLICATIONS

Typically used in stairwells, apartment and residential building entrances, waiting rooms and surgeries, etc.

## NB

Do not use with dimmers. Connection to the mains with terminal block.

Version with proximity sensor: ideal where increased visibility and safety is required obtaining the certainty of energy saving.

The sensor is housed inside a cover and is therefore invisible.

# FILINO T5

## TYPE

LED T5 replacement professional undercabinet/ceiling batten light.

## CHARACTERISTICS

It attaches to both walls and ceilings using the clip included. Filino T5 batten can be installed in series code KTLRT, up to a maximum of 10 units (20W/23W); 15 units (10W/14W); 20 units 4W. Exceptional light quality & easy fixing with the clips provided. On/off switch on the batten body; Free-wire connection: use the accessory cable with a separate code if a plug is required. Filino T5 batten can be installed in series by joining together the units or using the accessory connection cable, code KTLRT.

## MATERIALS

Shockproof plastic body and screen; anti-glare milky white screen. Package complete with free wires, connection, 4.

## BATTEN BT3

Designed for environments where diffused lighting and elevated visual comfort are required.

IP65 rapid connection

Impact resistant extruded polycarbonate

Can be used in series of up to 12 fixtures for the 40W model and up to 9 fixtures for the 50W model.

# BATTEN BT3

## TYPE

Linear ceiling fixture equipped with high efficiency LED sources. Fitted with a quick spring clamp for connection in series.

## CHARACTERISTICS

Quick opening mechanism for wiring. Easy to connect in series thanks to the quick spring clamp supplied. Can be used in series of up to 12 fixtures for the 40W model and up to 9 fixtures for the 50W model.

## MATERIALS

Polycarbonate body: opal polycarbonate screen equipped with internal fins for flow recovery and emission optimisation.

## ASSEMBLY

AISI 316 stainless steel 'snap on' bracket to anchor to the ceiling or to be used to suspend the fixture. Every package is equipped with both brackets and suspension cables (L= 96 cm).

## APPLICATIONS

Supermarkets, car parks, laboratories, warehouses.etc.

# WATERTIGHT S2 IP65

## TYPE

Linear TRI-PROOF luminaire for surface or suspended installations.

## CHARACTERISTICS

Complete with G13 lamp holder for use with replaceable T8 LED tubes, version for one or for two tubes.  
 AISI 316 stainless steel hinges. Quick opening mechanism for cabling. Can be easily connected in series thanks to the quick contact terminals.

## MATERIALS

Polycarbonate body; polycarbonate screen with internal photoetching for better light diffusion.

## ASSEMBLY

'Snap on' AISI 316 stainless steel brackets for ceiling or suspension installation.  
 Adjustable suspension cables available as a separate code.

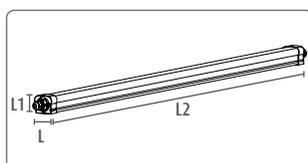

## APPLICATIONS

Production areas, car parks, laboratories and warehouses.

## TYPE

Suspension fixture for installations in large commercial and industrial spaces, equipped with an aluminium reflector with a 110° beam opening.

## CHARACTERISTICS

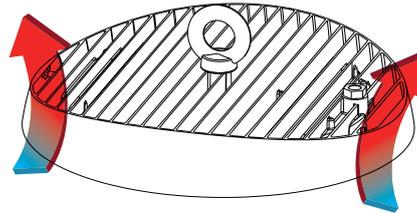

A monoblock body just 4,5cm thick. The entire body of the fixture is laminated to optimise heat dissipation. Integrated power supply, solid structure suitable for use in difficult situations. Free-wire cabling. Replaces discharge lamps up to 400W.

## MATERIALS

Powder coated die-cast aluminum body.

## APPLICATIONS

Professional lighting ideal for industrial environments and large indoor spaces.

Optimised design to maximise heat exchange

# HBL - BEATRIX LINEAR HIGH BAY

## TYPE

Suspension fixture for installations in large commercial and industrial spaces; uses SMD technology.

## CHARACTERISTICS

Fixtures with single optics to maximise flux. The collection is divided into versions with standard drivers and those with Tridonic drivers.

HBL PRO can be used in series of up to 10 fixtures for the 40W model and up to 6 fixtures for the 80W model.

## OPTIC

Optical systems composed of micro optics that direct the flux of the LED sources. The LED sources are protected by sealed optics to be used in dusty or dirty environments.

## MATERIALS

Extruded PC body; glass front screen.

## MOUNTING

Easy cabling using an IP65 connection box attached to the body of the fixture. Wall/ceiling installation with the brackets supplied or suspension mounted. The fixture is equipped with a 1m suspension cable. The separate accessory code for suspension installation includes 3m length cables.

# PANTH - SL2

## TYPE

LED projector for outdoor, indoor and construction site application.

## CHARACTERISTICS

Compact dimensions: easy to use and handle. Equipped with fixing bracket, adjustable on the vertical axis. Free wire for professional use (1.5 m long). It can be connected to motion or twilight sensors.

## MATERIALS

Grey painted pressed metal body. Completely sealed IP65 driver.

## NB

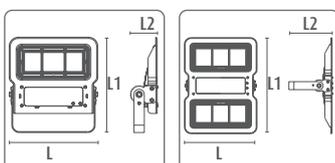

Non Dimming.

THE 200W MODEL CAN ALSO BE USED AS A HIGH BAY: 400 LUX AT 5 METRES HEIGHT.

The optional aluminium reflector provides direction the light: ideal in the workplace where video terminals or machines with LCDs are used, the antiglare optic prevents light from being reflected on screens positioned under the fixture.

# HB2 - HIGH BAY

## TYPE

Suspension fixture for installation in large commercial or industrial spaces; it uses SMD technology. Also available in a DALI version.

## CHARACTERISTICS

It is composed of an independent power supply system connected to the body of the fixture with small columns for improved thermal management. The optical unit is integrated into the aluminium body for perfect heat dissipation. The fixture body can be completed with an aluminium or polycarbonate reflector to obtain a different aesthetic and antiglare effect.

## OPTIC

The optical system is composed of an array of SMD optimised lenses with a beam opening of 90° for the 100W and 150W models and 120° for 200W models.

## MATERIALS

Grooved die-cast aluminium for heat dissipation.

## ASSEMBLY

Equipped with a mounting ring for suspension installation. For ceiling or wall installation order the accessory code that comprises the bracket and the relative accessories.

To obtain a more attractive aesthetic and reduce glaring the luminaire can be completed with an aluminium or a transparent polycarbonate reflector.

# MINILINI IP65

MINILINI allow to create a continuous line of light.

The IP65 wiring is located underneath the luminaire.

# MINILINI IP65

## TYPE

Mains voltage architectural linear projector for surface mounted installation.

## CHARACTERISTICS

It is constructed from extruded aluminium with an opal polycarbonate cover and is rated IP65 making it suitable for exterior environments: 40 mm wide and 295 or 585 mm long and available in various beam angles and wattages.

Accessories include a selection of fixed and angled surface mounting brackets providing installation uniformity or adjustable brackets for further flexibility.

MINILINI is complete with integrated protection from voltage spikes.

## DIMMABILITY

230V: Dimmable 10-100%; TRIAC Leading edge

## CONNECTIONS

Maximum connection length: see table.

## ASSEMBLY

Choice of surface mounting brackets with different fixed angles - 15°, 30°, 45° - or with adjustable brackets of different heights to be ordered with separate codes.

Steel brackets of different heights

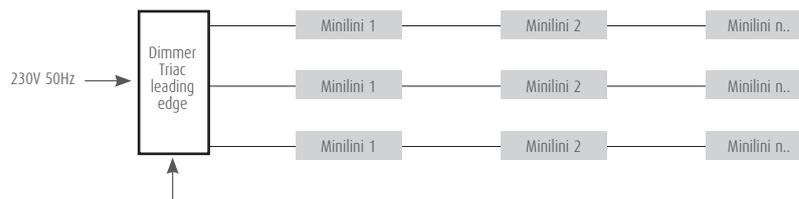

## BINNING

ANSI/SDCM: 2 step.  
2700K - 3000K - 3500K

## DIMMABILITY

Dimmable 10-100%  
TRIAC Leading edge

# INGROUND WALK-ON IP67

## TYPE

LED fixtures with SMD technology for inground installation; walk-on fixtures.

## CHARACTERISTICS

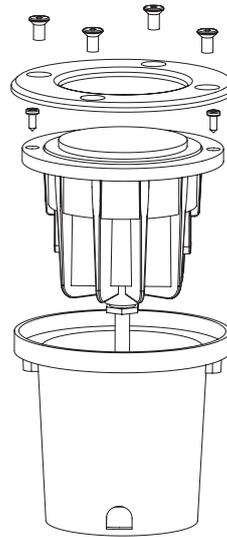

Complete with finishing ring and completely sealed transparent glass.

## MATERIALS

Metal body, brushed steel ring, shockproof IK10 glass screen; plastic sleeve.

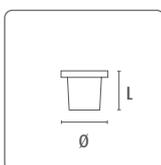

## NB

Do not use with drivers for halogen lamps; 12V AC/DC power supply not included.

## ACCESSORIES

## APPLICATIONS

Stairwell lighting, terraces, corridors, common areas, gardens, bathrooms etc.

# BULKHEAD T&O IP65

## TYPE

IP65 ceiling/wall light with new generation LED sources using SMD technology.

## CHARACTERISTICS

Typically used for diffused lighting for both indoor and outdoor or wet environments (IP65).  
Substitutes ceiling fixtures with fluorescent lamps to give immediate lighting without flickering and increased duration.

## MATERIALS

Shockproof plastic IK10 body and screen. Driver on board not accessible.

## MOUNTING

The bracket attaches to the wall or the ceiling and the fixture is screwed onto the bracket.

## NB

Non Dimming. The 50.000 hour version is suitable for public tenders.

# TECHNICAL DATA

# KEY

## PRODUCT CATEGORY KEY

<b>BASIC</b>	Ideal products for markets of consumers who desire a LED product and are seeking the most convenient solution in terms of its cost.
<b>PLUS</b>	Articles with outstanding performance and the best quality-price ratio, the best solution for the majority of applications.
<b>PRO</b>	Products for specific applications and top-level features, especially appreciable by industry professionals.
<b>PROJECT</b>	The articles identified as PROJECT are high-tech articles. Stock is often limited to a few demonstration items and production is activated for specific projects and quantities.

## LED WARRANTY SPECIFICATIONS KEY

### Warranties on all LED fixtures and LED lamps:

<b>G2</b>	Up to 2 years (4000h/year)*	*4000h = 11h a day x 365 days. Without limitations on the duration of use for the first year, provided the observance of the installation conditions.
<b>G3</b>	Up to 3 years (4000h/year)*	*4000h = 11h a day x 365 days. Without limitations on the duration of use for the first year, provided the observance of the installation conditions.
<b>G4<sub>/h24</sub></b>	Full Guarantee 4 years (24h/24h)	h24, provides Total Warranty! The winning element for great projects.
<b>G5<sub>/h24</sub></b>	Full Guarantee 5 years (24h/24h)	h24, Total Warranty up to 5 years use!

The specific guarantee that each item enjoys is clearly indicated in the catalog and is subject to compliance to the limitations of use. For details, refer to [www.duralamp.it](http://www.duralamp.it) or contact the sales force.

# KEY

## TABLE PAGES KEY

W	Rated watts for lamps or fixtures
V	Lamp or fixture voltage
lm	Lumen: unit of measurement of the flux emitted by a lamp or fixture. In the case of DURALAMP'S fixtures it indicates the real emission of the fixture in stable conditions. This data is the same used in the photometrics for lighting calculations.
K	K= Kelvin colour temperature indicated in Kelvin.
COLOUR NM	Colour in nanometres, unit of spatial measurement of wavelengths of visible/invisible radiation.
	Lamp cap
PF	Power Factor
	Beam opening
Ø/L1/L2/L3	Diameter and other dimensions expressed in mm except where otherwise indicated.
	Weight of single item article in grams (except where otherwise indicated)
	Minimum packaging: complying with packaging quantities when ordering speeds orders and ensures greater safety of goods.
	Minimum Order Quantity
	Class I Fixture- Fixture with protective earthing
	Class II Fixture - Fixture with double insulation, no earthing required
	Class III Fixture - Low voltage fixture, no earthing required
	Risk group 0: Does not cause any of the risks considered in the IEC/TR 62778:2014 standard
	Risk group 1: Does not cause risks due to normal operating limitations on exposure according to IEC/TR 62778:2014
	Do not cover with insulating material
	Can be used with a dimmer. A list of compatible dimmers is found in individual product files on the web site.
	Not to be used with a dimmer.
UGRxx	UGRxx: Indicates the degree of glare: the lower the number, the lower the glare
Ra>XX	Colour Rendering Index
XXXX00h	Operating life in hours indicated as L70 or L50, always measured at 25° room temperature AT. The lifespan is modified substantially with a rise in temperature.

# KEY

LX0	Operating life of a LED fixture or lamp maintaining the indicated flux: L70= 70% flux; L50= 50% flux.
IK08	IK Code, International Protection Marking, classifies and rates the degree of protection for light fixtures against external mechanical impact. IK01 0,15 Joule IK02 0,20 Joule IK03 0,35 Joule IK04 0,5 Joule IK05 0,7 Joule IK06 1,00 Joule IK07 2,00 Joule IK08 5,00 Joule IK09 10,00 Joule IK10 20,00 Joule
IPXX	IP Code, International Protection Marking, classifies and rates the degree of protection for light fixtures against the intrusion of solid particles (first number) and water (second number). IP20 protected against solid objects up to Ø 12 mm. IP23 protected against solid objects up to Ø 12 mm and sprays of water. IP40 protected against solid objects over Ø 1 mm. IP43 protected against solid objects over Ø 1 mm and sprays of water. IP44 protected against solid objects over Ø 1 mm and splashed water. IP54 protected against dust and splashed water. IP55 protected against dust and low pressure jets of water. IP65 Totally protected against dust and low pressure jets of water. IP66 Totally protected against dust and strong jets of water. IP67 Totally protected against dust and temporary immersion. IP68 Totally protected against dust and immersion in water (with an indication of the permitted depth in metres).
IPVI IPVO	IP rating of the internal housing side (VI) and Optic side IP rating (VO)

All measurements are expressed in mm except where expressly indicated.

# NB

Available on order: the message "Available on order" often appears in the catalogue. We've added it to offer our customers the broadest choice option. Careful though: if an article is available "on order", it means that it is not readily available in stock and only minimum quantities are available for purchase. We therefore recommend that you contact sales for further details.

## CERTIFIED QUALITY

All Duralamp products are CE marked, ie they comply with all applicable European Directives. The UL mark is issued after certification of the product by third parties such as UL, an independent, non-governmental and non-profit organisation whose mission is to ensure that products conform to standards set by ANSI, the American National Standards Institute. UL certification is therefore a Quality and Safety mark and is required for products to be used in the United States and countries that make reference to the same standards.

The EAC mark is the Euroasian Conformity mark required for exporting products to the Customs Union of Russia, Belarus, Armenia, Kazakhstan, Kyrgyzstan. It is comparable to the CE mark and refers to the declaration of compliancy to the technical standards required by the Eurasian Customs Union.

## CERTIFIED COMPANY

Duralamp operates under ISO 9001, an international reference standard for quality management of all company processes.

# TECHNICAL ANALYSIS

lm

## FLUX AND EFFICIENCY

Luminous Flux and Efficiency represent the key information for the evaluation of the performance of a product. What do they represent exactly? Luminous flux represents the emission of the LED source, that is the total amount of light produced by the light source. Efficiency represents the ration between the emission and the power absorbed by the source, that is the total amount of emitted light divided per the energy consumed by the LED source. Nowadays there is not a sole way of publishing these data, each company on the market makes its own choice. This means that catalogues of different companies publish different kinds of information, ranging from the data declared by LED producers to values referable to the LED source in peculiar conditions, but also to values that take into account the "loss" due to reflectors, lenses, drivers and so on. In general, the most reliable data is the value measured on the fixture in its effective usage conditions. In order to let our customers have a clearer idea of the declared data, Duralamp specifies for each LED fixture both its effective flux/efficiency values and the values directly referable to the source, as declared by the producer. The purpose of this methodic choice is to simplify the understanding of the data, and, consequently, to provide our customer the immediate possibility of comparison among Duralamp lighting fixtures and those by other brands. The rapid technical progress of LED sources results in continuous changes in terms of luminous flux and, consequently, efficacy. The information provided by the catalogue should therefore be referred to the date of publication - for regularly updated information please visit the site web.

L70

## LED LIFESPAN

LED lamps, unlike traditional lamps do not suddenly stop working but gradually decrease their initial flow unless there are defects or electric shocks. A LED lamp is considered to be no longer functioning it reaches 70% of their initial flow (L70). Life tests are performed following standard IES LM-80. The life span of LED lamps is strongly influenced by the lamps operating temperature once they are installed in fixtures. Duralamp fixtures are designed to have a very low LED operating temperature to ensure the lamps have a very long lifespan.

According to the IEC / PAS 62717 standard, the useful life of a LED can be defined with an additional parameter, for example 50'000h L80B10, meaning the period of time (50'000h) in which 10% (B10) of the LED products of the same type has gradually fallen below 80% of the initial nominal flux.

L80 B10

TC

## TEMPERATURE AND PERFORMANCE

The working temperature of a LED source has a significant effect on its useful life, maintenance of luminous flux and efficiency. Correct temperature management, i.e. thermal management of the power in use is a crucial factor in ensuring the performance and reliability of products.

The main characteristic to determine reliability of a product and consistency of performance is measuring the junction temperature (Tj), that can be measured indirectly as luminous flux and the useful life are linked to this parameter. Tj values between 60°C and 90°C allow you to have products with high reliability, performance and estimated lifespans that adhere to market demands. Careful attention must be paid when reading the declared data given that LED manufacturers provide data on the flux at a temperature of Tj 25°C, a condition that is not physically possible for normal use where the LED source is turned on and tested in a fraction of a second and does not produce any heat. Duralamp products are measured and characterised for thermal stability to provide real data on everyday use for the catalogue and users. Well-designed fixtures that ensure proper dissipation also ensure constant flow, colour and spectrum parameters as well as reliability and durability in the declared lifespan.

## COLOUR CONSISTENCY

LED lamps have extensive production tolerances in relation to chromaticity. For years Duralamp has only used lamps with colour consistency that is measured using the MacAdam Ellipse system. This allows for absolute repeatability of the colour characteristics compared to the binning based system. LED lamps used by Duralamp are at least 3-steps of MacAdam (3SDCM).

Ra

## COLOUR RENDERING INDEX CRI or Ra

The colour rendering index CRI indicates the ability of a light source to reveal colours faithfully. Lighting a coloured object with two sources with different CRI will reveal different colours depending on the source used. It is important not to confuse the CRI with data relating to the colour temperature of a source (expressed in K); two sources with the same colour temperature can have different colour rendering indexes. The CRI strongly influences the efficiency of a LED source and many times lighting designers have to choose between the quality and quantity of light. The LED sources that are fitted in products in the Duralamp collection normally have a colour rendering index that reaches CRI 85. In some case there are also sources with a high colour rendering index (CRI>95).

TM30

## New TM30 Standard - a more precise colour definition

It is evident that a single index is not sufficient to completely characterize the colour rendering of a source. The TM-30 is the method by which we group together well-known evaluation systems, organized in a systematic way, with the introduction of two other different indexes, the Fidelity Index Rf (which indicates the fidelity of colour rendering) and the Gamut Index Rg (used to evaluate the increase or decrease in saturation), in turn accompanied by a form of graphic representation. Furthermore the method evaluates the illuminant on 99 samples (CES) that reflect the colours of the leaves, flowers, skin tones, paintings, etc. so as to extend our ability to establish its specific rendering.

UGR

UGR (Unified Glare Rating) is a unified factor in the international field developed by the CIE (International Commission on Illumination) to evaluate direct discomfort glare due to the use of lighting products. In the European Standard relating to indoor workplaces UNI EN 12464-1, the UGR varies from a minimum value of 10 (no glare) to a maximum value of 30 (considerable glare). The lower the value the lower the glare. The UGR value needs to be calculated because it takes into account the size and characteristics of the environment, the background luminance (ceiling, wall, etc), the luminance of light fixtures and the position of the latter in relation to the observation point.

- UGR classification applications
- <13 imperceptible
  - 16 perceptible technical drawings
  - 19 perceptible reading, writing, schools, offices, working on a pc
  - 22 perceptible industry and crafts
  - 25 uncomfortable raw industrial jobs
  - 28 uncomfortable railway tracks, warehouses
  - >28 intolerable

## PHOTOMETRICS KEY

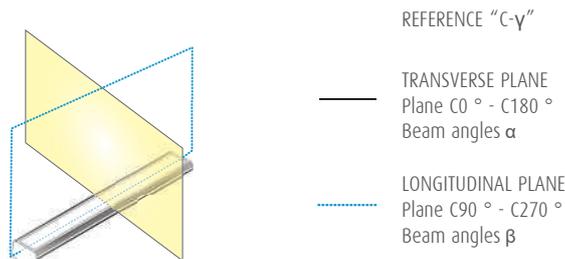

Photometric measurements were taken at the Duralamp Photometric Laboratory. These measurements are performed at a room temperature equal to  $25 \pm 1$  °C as required by UNI EN 13032-1 - Light and lighting - Measurement and presentation of photometric data of lamps and luminaires - Part 1.

The photometric values quoted are dependent on the optical system to which they relate, and from the light source used. In order to improve its production, the Company reserves the right to change these optical systems and consequently relative photometric data without notice.

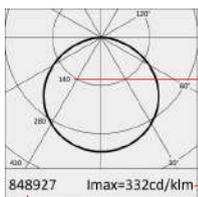

For ease of use, the photometric curve present within this catalogue is shown and explained below.

On the web site [www.duralamp.it](http://www.duralamp.it) the special section "INFO TECH /Eulumdat" provides all the photometric data in ldt. format that is also given on every product data-sheet.

The photometric curves shown in this catalogue are compiled according to the "C-γ" international reference system, where the C0-C180 plane is perpendicular to the fixtures and the C90-C270 plane is parallel to the fixtures, as depicted in the figure. For symmetrical and rotationally symmetric fixtures therefore, a single curve is used.

2	6.61	98	
3	9.92	43	Ø LUMINOUS CONE (m)
4	13.23	24	
5	16.53	16	MAX ILLUMINATION (lx)

All Duralamp luminaires have integrated LED sources that cannot be separated: therefore the source flux and the luminaire flux show the same value.

# GENERAL SALES CONDITIONS

## 1. Applicability

**1.1** These general conditions (hereafter the "Conditions") constitute an integral and essential part of the contract of sale between the Parties. The Conditions shall regulate all legal relationships between Duralamp S.p.A. (hereafter "Duralamp") and the purchaser (hereafter the "Purchaser") where the said relationships are not disciplined by the applicable terms of the Italian Civil Code (C.C.). The nullity of any of the terms of these Conditions shall not prejudice the validity of the remaining Conditions or the Contract.

**1.2** Any changes to these Conditions shall be agreed between the Parties in writing, with the exception of the provisions set down in article 1341 of the Italian C.C..

## 2. Sales

**2.1** Sale requests for the products (hereafter the "Products") shall be accepted 'subject to the seller's approval' and shall be considered to be irrevocable in accordance with and as an effect of article 1329 of the C.C. for a period of 1 (one) month from the date of the order requesting execution without prior acknowledgement, pursuant to and as an effect of article 1327 of the C.C. from the date on which the order is received by Duralamp.

**2.2** The Products detailed in the individual orders and the relevant accessories shall be supplied to the Purchaser by Duralamp with "Retention of Title" pursuant to and as an effect of articles 1523-1526 of the Italian C.C. In this case, the transfer of ownership of the Products to the Purchaser shall take place exclusively upon the full payment of the price agreed, whilst any risks shall be the responsibility of the Purchaser from the moment of delivery of the Products.

**2.3** Whilst confirming the terms stated above, the Parties hereby agree that should the Products and relevant accessories be destroyed for causes not attributable to Duralamp, the Purchaser shall not be released from the obligation to pay for the same, even where the Products have not yet been delivered.

## 3. Prices

**3.1** The prices detailed on the price list shall be applied to Product sales orders. The aforementioned prices shall be unit prices per single item, except where stated otherwise for certain Products. The Parties shall have the right to agree, in writing, any derogations and/or special conditions of sale.

**3.2** Moreover, the Parties hereby agree that the following conditions shall be applied:  
(I) Minimum order: € 300 (three hundred) for Italy - € 750 (seven hundred and fifty) for other countries;  
(II) Delivery free to destination in Italy for orders of € 300 (three hundred) for Italy or more;  
(III) Ex-Works deliveries for other countries.

**3.3** The prices given above do not include VAT and installation costs.

**3.4** The prices provided in this catalogue shall be valid until a new price list is published.

## 4. Currency

All prices are given in Euros (exclusive of VAT). Invoices shall be drawn up in Euros.

## 5. Special requests

Products can be supplied to the Purchaser in non-standard colours and with special features. The relevant price, minimum quantities per order, methods and timing of deliveries shall be agreed in each individual case, in relation to the reference order.

## 6. Transport

**6.1** Duralamp shall not be liable for any damage and/or losses which may occur during the transportation of the Products, unless the Products are delivered free at destination.

**6.2** Duralamp shall have the right to establish the method of transportation to be used for the Products, unless the Parties have previously established a method of transport in writing.

**6.3** Upon delivery, the Purchaser shall undertake to verify the condition of the products and shall make any complaints directly to the carrier and/or conduct any actions necessary in the event of loss, misplacement, removal or damage, or delays in transportation and/or the methods of delivery of the Products.

## 7. Complaints

**7.1** In the event that the Products are found to have any faults and/or defects, the Purchaser shall undertake to notify Duralamp of the same in writing, by means of a registered letter, no later than 8 (eight) days following the discovery of the said faults and/or defects, at the risk of invalidating the obligations of the guarantee provided by Duralamp. In this case, the faulty Products, which should be reported within the terms established, should be returned to Duralamp, once the Purchaser has received specific permission to do so in writing.

**7.2** In the event that the Purchaser's complaints are held to be valid, Duralamp, at its complete discretion, may make the necessary repairs and/or replace the Products, excluding the attribution of any further charges, obligations, indemnification or compensation to the same. The Products in question should be returned to the Duralamp S.p.A. plant in Via Pratese 164, 50145, Firenze, Italy. In the event that, following an inspection by Duralamp, the Products returned by the Purchaser are not found to be faulty and/or defective, Duralamp shall return the Products to the Purchaser, charging the same an amount equal to 15% (fifteen percent) of the value of the said Products.

## 8. Delivery

**8.1** The Parties hereby agree that the terms established for the delivery of the Products shall not be considered absolute or essential and that, in any case, each item shall be exclusively in favor of Duralamp, unless otherwise agreed in writing between the Parties.

**8.2** In the event of delayed delivery, once 15 (fifteen) days have passed since the agreed date, the Purchaser may send Duralamp written warning to complete the delivery within a further term of no more than 15 (fifteen) days from receipt of the same. In the event that Duralamp has not completed the delivery within this further term the Purchaser may withdraw from the order with regard to the Products that have not yet been delivered. In this case the Purchaser shall only be obliged to pay Duralamp for the Products actually delivered, excluding the payment of any further indemnification and/or compensation to the Purchaser.

**8.3** Duralamp shall not be responsible for any other breaches, including the failure to deliver or delayed delivery of the Products, caused by events outside its reasonable control such as, purely by way of an example and not limited to the same: the failure to deliver or delayed delivery of manufacturing materials by Duralamp's suppliers, equipment breakdowns, strikes and other trade union action, electricity blackouts, suspension of or difficulties with transportation.

## 9. Payment

**9.1** The price due shall be paid by the Purchaser according to the conditions and modalities set down in the order and, in any case, by means of payments made exclusively to "DURALAMP S.P.A."

**9.2** Duralamp shall only recognize the validity of the payments when the same are made in compliance with the provisions of article 9.1 above. This means that amounts paid using any other method shall not be considered to be a payment in discharge of the Purchaser's obligations. The eventual acceptance by Duralamp of a bank draft or other trade bill shall only occur with the application of the proviso "under usual reserve".

**9.3** In the event of delayed payment with respect to the terms agreed, the Parties hereby agree that bank interest shall be due to Duralamp at the current PRIME RATE increased by 3 points. Interest shall be applied as of right, with no obligation for Duralamp to send the Purchaser a formal notice to pay.

**9.4** Moreover, in the event of a delay in payment of more than 15 (fifteen) days, Duralamp shall have the right to terminate the order as of right pursuant to article 1456 C.C., sending written notification of the same, barring compensation for any damage.

**9.5** In the event that the Parties have agreed upon a method of payment by instalments for the Products, the failure to pay several instalments or just one instalment exceeding one eighth of the overall price of the Products, shall result in the loss of the Purchaser's right to pay in instalments and shall give Duralamp the right to request the remaining balance of the price or, alternatively, at its own discretion, to terminate the contract with immediate return of the Products and the acquisition of the instalments paid, as indemnification, barring the right to compensation for any damage sustained.

## 10. Guarantee

**10.1** The Products provided by Duralamp shall be guaranteed for a period of 12 (twelve) months from the date of delivery against any manufacturing or material defects and/or faults and against any breakdowns not attributable to the Purchaser. Duralamp's only obligation and the Purchaser's right with regard to claims related to the guarantee shall be limited, as decided by Duralamp, to the replacement or repair of the defective or non-compliant product or the reimbursement of the price for the purchase of another product. Duralamp shall be granted a reasonable amount of time to repair or replace the product, or to make the previously authorized reimbursement. Any defective or non-compliant Products shall become the property of Duralamp as soon as they have been replaced or reimbursed.

**10.2** The guarantee shall exclude any failures due to circumstances beyond the control of Duralamp (lightning, flooding, etc.), as well as any damage caused by the improper use of the Products and/or relevant accessories. Notwithstanding the above, Duralamp shall not be bound by the guarantee if the contested defects or non-compliances have occurred as a result of submitting the Products to resistance or environmental tests, the incorrect use of the same, or in the event that the use of or conditions of use of the Products is different from that indicated in the instructions and technical information, as a result of negligence, incorrect installation or accident, or if they derive from improper repairs, alterations, modifications, storage or transportation or by incorrect handling.

**10.3** The Purchaser shall send the Products returned in accordance with the terms of the guarantee to the place indicated by Duralamp in compliance with the Duralamp policy regarding authorization to return materials in force at the time. In the event that the Products returned are found to be compliant or not faulty, the Purchaser shall pay the cost of returning the same as well as the cost of insuring, inspecting and handling the Products.

**10.4** LED products Enjoy specific guarantees: details are published on [www.duralamp.it](http://www.duralamp.it)

## 11. Limitation of Liability

**11.1** WITH THE SOLE EXCLUSION OF CRIMINAL INTENT AND GROSS NEGLIGENCE, DURALAMP SHALL NOT BE LIABLE FOR LOSS OF PROFITS OR SAVINGS, LOSS OF REPUTATION OR GOODWILL, ANY DIRECT, INDIRECT, CONSEQUENTIAL OR SPECIAL DAMAGE THAT MAY DERIVE FROM OR BE CONNECTED TO THE CONTRACT OR SALE OF PRODUCTS OR SERVICES BY DURALAMP OR BY THE USE OF THE SAME OF A CONTRACTUAL OR EXTRA-CONTRACTUAL NATURE OR DERIVING FROM ANY OTHER SOURCE, EVEN WHERE DURALAMP HAS BEEN NOTIFIED OF OR IS AWARE OF THE POSSIBILITY OF SUCH DAMAGE.

**11.2** The limitations and exclusions stated in article 11 shall apply within the limits permitted by law.

## 12. Applicable law and place of jurisdiction

**12.1** These Conditions and all the effects of the same shall be governed by Italian law. The Parties hereby agree that any disputes related to these Conditions shall refer to Italian jurisdiction to the exclusion of all others.

**12.2** The exclusive place of jurisdiction shall be the registered offices of Duralamp S.p.A., with the express exclusion of any other competing places of jurisdiction.
