

Festoon Light | 10m | 20pcs E27 socket | incl. power cable

Article number: 585-125

There is a huge difference between professional festoon lights - the Tronix kind - and the much cheaper party lighting products you can find online or at any DIY or discount store. Professionals know this, but end customers often don't. For safe use, long-term durability, and flexibility in custom-made results it is important to pay attention to this. When looking for sustainable product solutions to count on all-year round, poor product decisions will ultimately make you regret putting price first.

This set of festoon lights consists of: 1x 585-105 + 1x 585-110.

features:

- Set of festoon lights including power cable
- IP65 (cable and sockets) IP44 (female/male connector with end cap)
- Professional set of festoon lights made of high quality rubber with molded sockets. Excluding bulbs, including power cable
- Connect up to 200 meters / 2000W
