BELT LIGHT: ALL YEAR ROUND APPLICABILITY

Belt Light can be used as a string light for trees in the Christmas season, but also as a festive, multi-functional Partylight during summer. Being fully connectable with Pro System Modular 230V, Tronix Belt Light can easily be integrated in your own creative light design.

Designed for flexibility

The Beltlight String has a rubber cable designed for flexibility and good resistance to all weather conditions. This type of material is easy to work with because it's highly flexible and therefore ideally suited for hang-up between two objects, or for easy tree decoration with single bulb hangup attachments. With PVC, non-breakable bulbs.

Features

- IP65, waterproof
- Compatible with 230V Pro System
- Including 010-013 Schuko Power Cable
- 4x LED per bulb
- Triac dimmable
