

LED spot | 50mm | white | 5 watt | 38° | 2000~2700K | dtw

Tronix Lighting introduces the perfect substitute for all Ø50mm GU10 Spots: a similar sized all-performance LED Spot that has an incredibly stable (dim to warm 2000k~2700K) function and does NOT flicker.

It often occurs that normal GU10 Spots cannot be applied because of a lack of space. This alternative LED Spot with internal led driver only counts 26 mm in height (31 mm with cable) for a suitable fit with just any ceiling application.

In addition, this competitive light source has a connection block with strain relief, enabling a direct connection onto 230V: a winning solution for every installer!

For a perfect dim to warm result, use the LED Spot with the Tronix universal Triac LED Dimmer (art. no. 215-131).

Features
