TRONIX

Before first use

Before getting started with this product, it is advisable to check the order completeness and any damage. If this is the case, please contact Tronix Lighting.

Description

This sturdy track spot features a strong, dimmable LED chip. This not only gives you plenty of light, but also a lighting experience that can be fully customized.

Features

- Smooth heat dissipation thanks to loose placement of lamp and driver;
- Easily combine with our range of 3 phase rails and accessories, all available in matching colors for the perfect custom solution.

Installation

1. Turn off the power and remove the product and associated parts from the packaging.
2. Determine the location for installation and assemble the rail and selected accessories;
3. Insert the track spotlight into the rail and determine the phase to connect it to the mains;
4. Check the complete installation. Should this be in order, you can reactivate the power.

Safety

Safety is a top priority at Tronix Lighting. Therefore, we heartily recommend that you follow the following steps closely:

- Keep this manual carefully for future reference;
- Choose a qualified electrician while installing, maintaining or inspecting this product;
- Never look directly into a light source to avoid possible eye damage;
- Ensure that the respective power group is always on non-active when the product is connected;
- Use only recommended combinations (LED drivers, controllers or dimmers) to avoid injury or damage to the product;
- The light source of this spotlight is not replaceable. Because of this, you need to replace the entire fixture towards the end of its life and it is not recommended to open it.

Technical problems and repair

Should a product not work properly after installation, or if the product exhibits problems over time, it is advisable to check the following elements:

- Check the wiring and installation of your product;
- Check for the presence of interfering elements such as dust, water or other electronics;
- If possible, try disconnecting the product and testing it in another location to rule out a problem at the location;
- Should you be dealing with a WIFI-based product, check and reset your router's settings.

Should the product still not work after testing, it is recommended to send it in for inspection and/or repair. To do so, please contact Tronix Lighting using nearby details and proof of purchase (packing slip).
